

## Storyboard

Search bar that allows user to search words most important and see which sorority matches best.

graph displaying results from each sorority

Information about the sorority displayed

## Design 1

- I want to add tabs to the website that enable the user to see information about each sorority individually.

- Links to their external websites will be provided

I want to focus on the aesthetics of the website in the last phase to ensure it looks like a credible, usable site.
